

## The most important features

- Chemical pen for paper inspection
- Works on almost all non-polymeric currencies
- No residues on real banknotes

The classic that started it all. Black line - counterfeit banknote. If it were that simple... better use electronic testers. Suitable for almost all currencies.

### **Note for use in counterfeit detection:**

Please note that the examination of banknotes exclusively on paper basis does not offer reliable protection against counterfeit money. For reliable counterfeit detection, take a look at our electronic counterfeit detectors CCE 10 / 20 / 30.

### FEATURES

- Chemical test pen for paper testing
- Works on almost all cotton-based banknotes, not on polymer currencies (e.g. Australia)
- Easy to use:
- If the mark on the banknote turns dark brown to black, the note is wrong.
- No residues on banknotes according to ECB specifications
- Results within seconds
- Approx. 6,000 applications per pen

### TECHNICAL SPECIFICATION
